We ship by B. & O., N. Y. C., Pennsylvania and D. T. & I. railways, by Truck Line Freight or Railway Express.

TERMS: Sixty days net to parties of approved credit established in advance of shipment. Discount for cash with order 3%; 2% for payment within ten days of invoice, 1% 30 days. C. O. D. orders must be accompanied by $\frac{1}{4}$ cash deposit. Boxing and baling are charged for at cost. For schedule of charges for new boxes see next to last page. Used boxes are less and will be used when available and practical. When cash accompanies order, boxing will be billed to those of established credit, otherwise boxing charges will be sent as C. O. D., with shipment. We assure you that this additional charge will be reasonable and at actual cost. 5 or more at 10 rate; 25 or more at 100 rate, except items of deciduous lining out stock tied in bundles of 50. On long assorted lists of lining out stock where quantities are less than 50, a higher price may be charged. Less than 5 will be charged 25% higher than 10 rate. Any possible claims for rejection or deficiency must be made within ten days after arrival of stock. All shipments travel at cost and risk of the purchaser except when otherwise agreed.

DECIDUOUS GRAFTS

The understocks for these deciduous grafts are established one year in 2¼" and 2½" deep rose pots before grafting, thereby insuring a well established and pot bound plant.

The foliage is semi-evergreen and is hardy. A much more vigorous grower than <i>Viburnum carlesi</i> and the long stems make it a good subject for cutting.) 8 to 12 in. grafts,		30.00
3 yr. grafts, 3" pots,		40.00

EVERGREEN GRAFTS

These grafts are out of 2¼" and 2½" deep rose pots and are on strong well established understocks of the same families, ie: Junipers are grafted on *Juniperus virginiana* understocks.

For shipment we wrap the pot balls individually in sphagnum moss then in waxed paper to preserve the moisture and prevent undue breakage of the ball. We know of no better method of packing grafts.

These are young field grown, three times transplanted evergreens from 48" rows - are excellent for transplanting to grow on or for small landscape sizes. We have been trying for years to build up a supply of this material which we could sell at prices like these. All material is grafted on red cedar or Juniper Chinensis understocks and is young, healthy, first class, and a bargain.

GLOBE BARBERRY

(Plant Patent No. 189)

(*Berberis thunbergi nana*)

See Prof. Chadwick's Select List of Shrubs

Ordinary Barberry

Berberis nana
(Natural Shape)

This is a low, slow growing and compact sport of the well known hardy Barberry. It's compact, tight growth makes a trim appearance without shearing. This plant never gets out of hand as do common Barberry plants and the foliage is better than that of the parent and it has the same kind and color fruits. Its appearance is somewhat like that of a dwarf Holly or Azalea. It is undoubtedly the best permanently dwarf deciduous plant for low hedges and borders because of its dwarfness, hardiness and general permanence.

This is the first time this plant has been offered for sale. Due to its slow growth the purchaser is assured of maintenance of the present price schedule. It is suggested that as large sizes cannot well be shipped these grades be planted out for growth on as specimens.
